1. Multiple catch statements

CODE:

```
1 public class Main{
2     public static void main(String[] args){
3         try{
4             int a=10;
5             int b=0;
6             int result=a/b;
7             int arr[]={1,2,3};
8             System.out.println(arr[5]);
9         }
10        catch(ArithmeticException e){
11            System.out.println("cannot divide by zero");
12        }
13        catch(ArrayIndexOutOfBoundsException e){
14            System.out.println("array index out of bounds");
15        }
16        catch(Exception e){
17            System.out.println("some other exception occured");
18        }
19    }
20 }
```

OUTPUT:

```
cannot divide by zero

...Program finished with exit code 0
Press ENTER to exit console.
```

2. StringIndexOutOfBoundsException

CODE:

```
1 public class Main{
2     public static void main(String[] args){
3         try{
4             String str="java";
5             System.out.println(str.charAt(10));
6         }catch(StringIndexOutOfBoundsException e){
7             System.out.println("array index out of bounds");
8         }
9     }
10 }
```

OUTPUT:

```
array index out of bounds

...Program finished with exit code 0
Press ENTER to exit console.
```

3.FINALLY

CODE:

```
1 public class Main{
2     public static void main(String[] args){
3         try{
4             int a=10;
5             int b=0;
6             System.out.println(a/b);
7         }catch(ArithmeticException e){
8             System.out.println("cannot divide by zero");
9         }finally{
10            System.out.println("finally block is excuted.");
11        }
12    }
13 }
```

OUTPUT:

```
cannot divide by zero
finally block is excuted.

...Program finished with exit code 0
Press ENTER to exit console.
```

4.THROW

CODE:

```
1 public class Main{
2     public static void main(String[] args){
3         int age=17;
4         try{
5             if(age<18){
6                 System.out.println("you are not elligle for vote");
7             }else{
8                 System.out.println("you are eligible for vote");
9             }
10        }
11        catch(Exception e){
12            System.out.println(e.getMessage());
13        }
14    }
15 }
```

OUTPUT:

```
you are not elligle for vote

...Program finished with exit code 0
Press ENTER to exit console.
```

5.THROWS

CODE:

```
1 public class Main {
2     static void checkAge(int age) throws Exception {
3         if (age < 18) {
4             throw new Exception("Not eligible to vote");
5         }
6         else {
7             System.out.println("Eligible to vote");
8         }
9     }
10    public static void main(String[] args) {
11        try {
12            checkAge(20);
13        }
14        catch (Exception e) {
15            System.out.println(e.getMessage());
16        }
17    }
18 }
```

OUTPUT:

```
Eligible to vote
```

```
...Program finished with exit code 0
```

```
Press ENTER to exit console.
```
